INDUSTRIAL FENCE GUARDING AND SCREEN WALLING

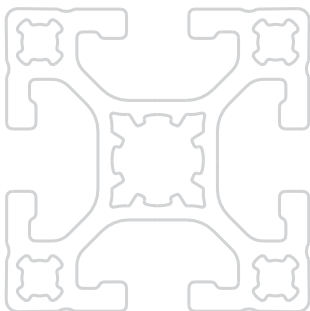

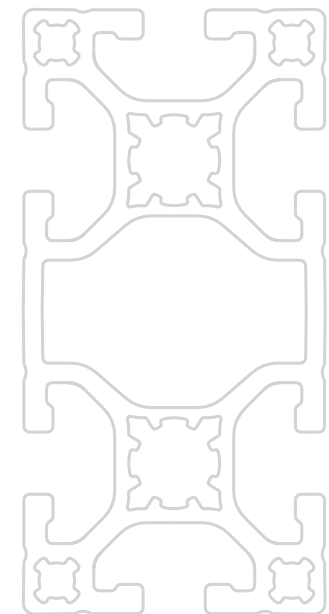

Introduction

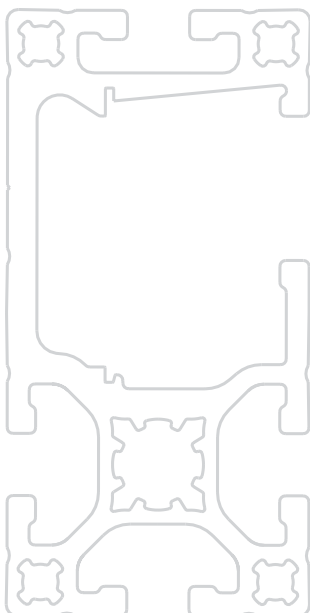

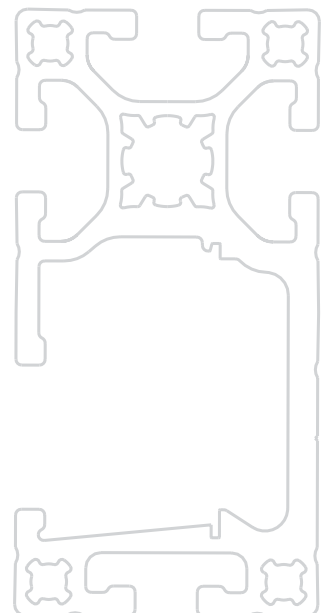

Industrial perimeter fence guarding, machine guarding, screen and partition walls. Our modular fence guarding system is based on our MONEX40 extruded aluminium frame building system.

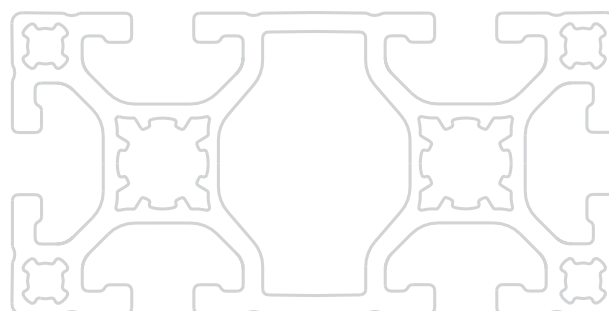

Typical modular panels are 2040mm high and 1100mm wide using frame sections of 40 x 40mm and 40 x 80mm. All electrical wiring is housed within the frames and accessed by removing a 19mm capping strip.

Window panels are supplied in clear high impact PETG polyester or polycarbonate. Opaque panels in rigid expanded plastic with a 'wipe clean' surface. Colours available are blue, gray, white, green, yellow, red and black. All panels are secured 'rattle free' in the extrusion slot by rubber glazing strip. All extrusion slots can be sealed with a clip in extruded filler strip.

A key-interlock system can be fitted to guarding, to comply with British standards, the system we use is made by Castell.

Fence Guarding Type M6300

MONK

Examples

Installation for Hewlett Packard in Ireland. Perimeter fence guarding type M6300, with Castell fully interlocked key access for maintenance personnel and light curtain access for pallets loaded with components.

Clear polycarbonate viewing panels allow operatives to watch the system operating.

Installation for Alcan Packaging Lawson Mardon. Used here to separate and enclose different departments in their open plan factory. Barriers help to protect the panels from accidental damage by fork lift trucks.

Fence guarding helps to enhance the appearance of a process plant.

Examples

Stores shown under construction.

Installation for Alcan Packaging
Lawson Mardon.

Used here to enhance the appearance of the end wall of the factory. A screen wall 4.8 meters high and 33 meters long was installed to hide the stores area.

Stores, racking or wall mounted services can easily be hidden from view but still be accessible by using this type of screen walling.

Fence Guarding Type M6200

MONK

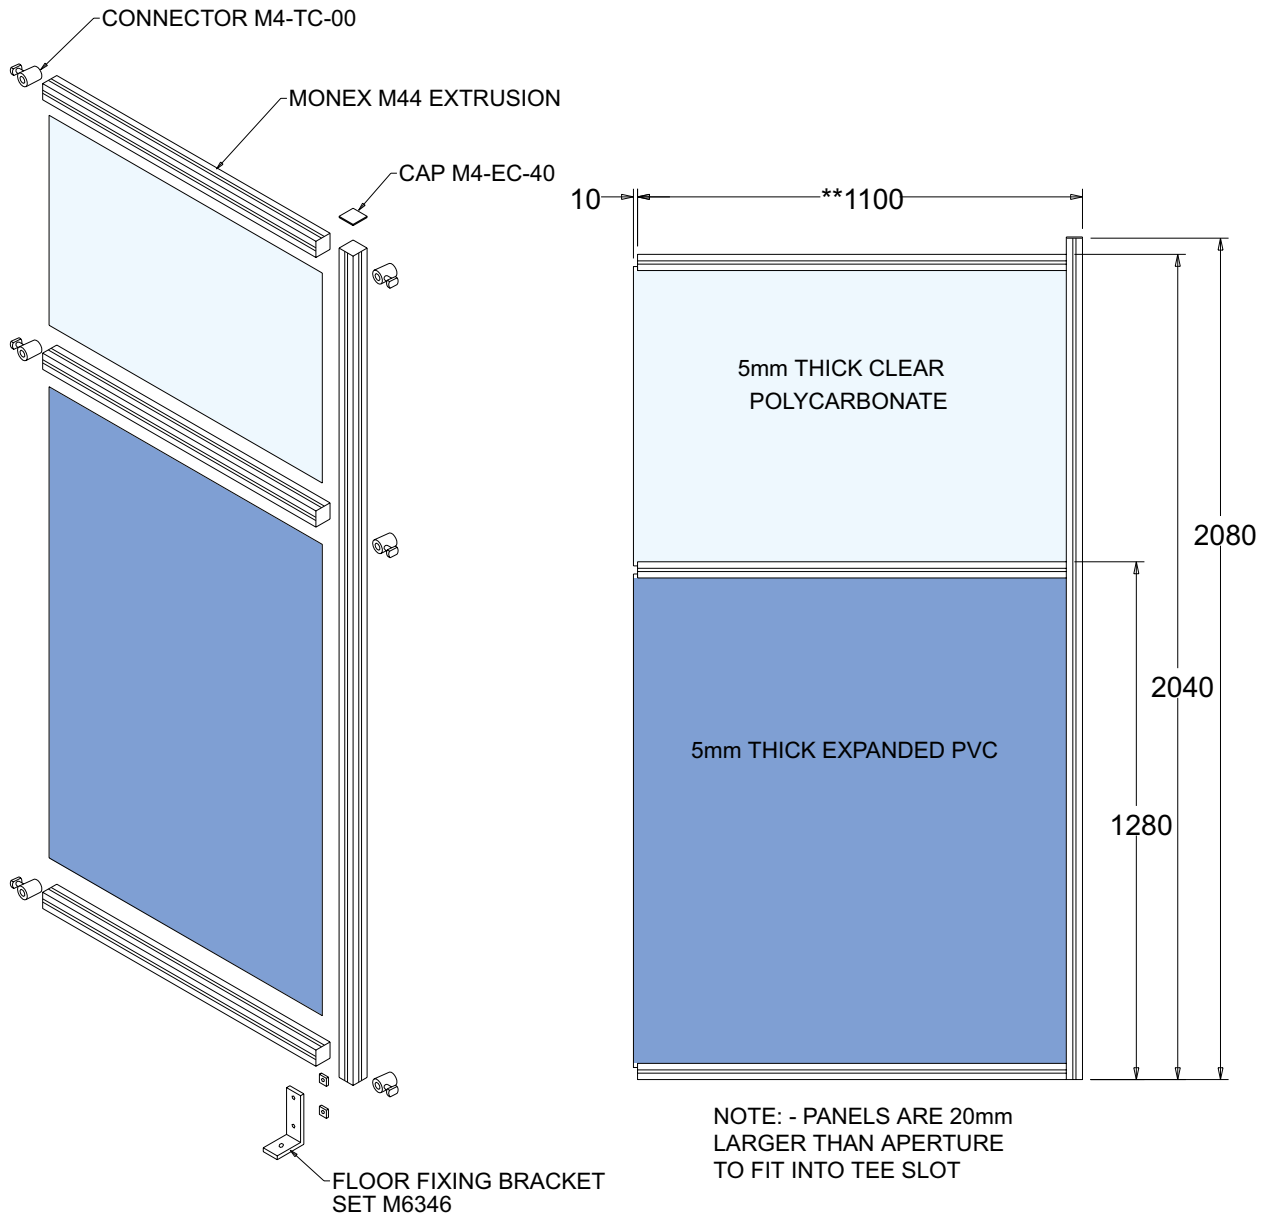

Fixed panel

Modular fixed plain panel

Choice of panels:

- Expanded PVC with an 'easy clean' surface in blue, grey, green & yellow.
- Clear polycarbonate.
- Steel mesh powder coated.

**Standard pitch 1100mm, other sizes available.

ORDERING EXAMPLE

M6200-2040-1100-PVC-B-PC

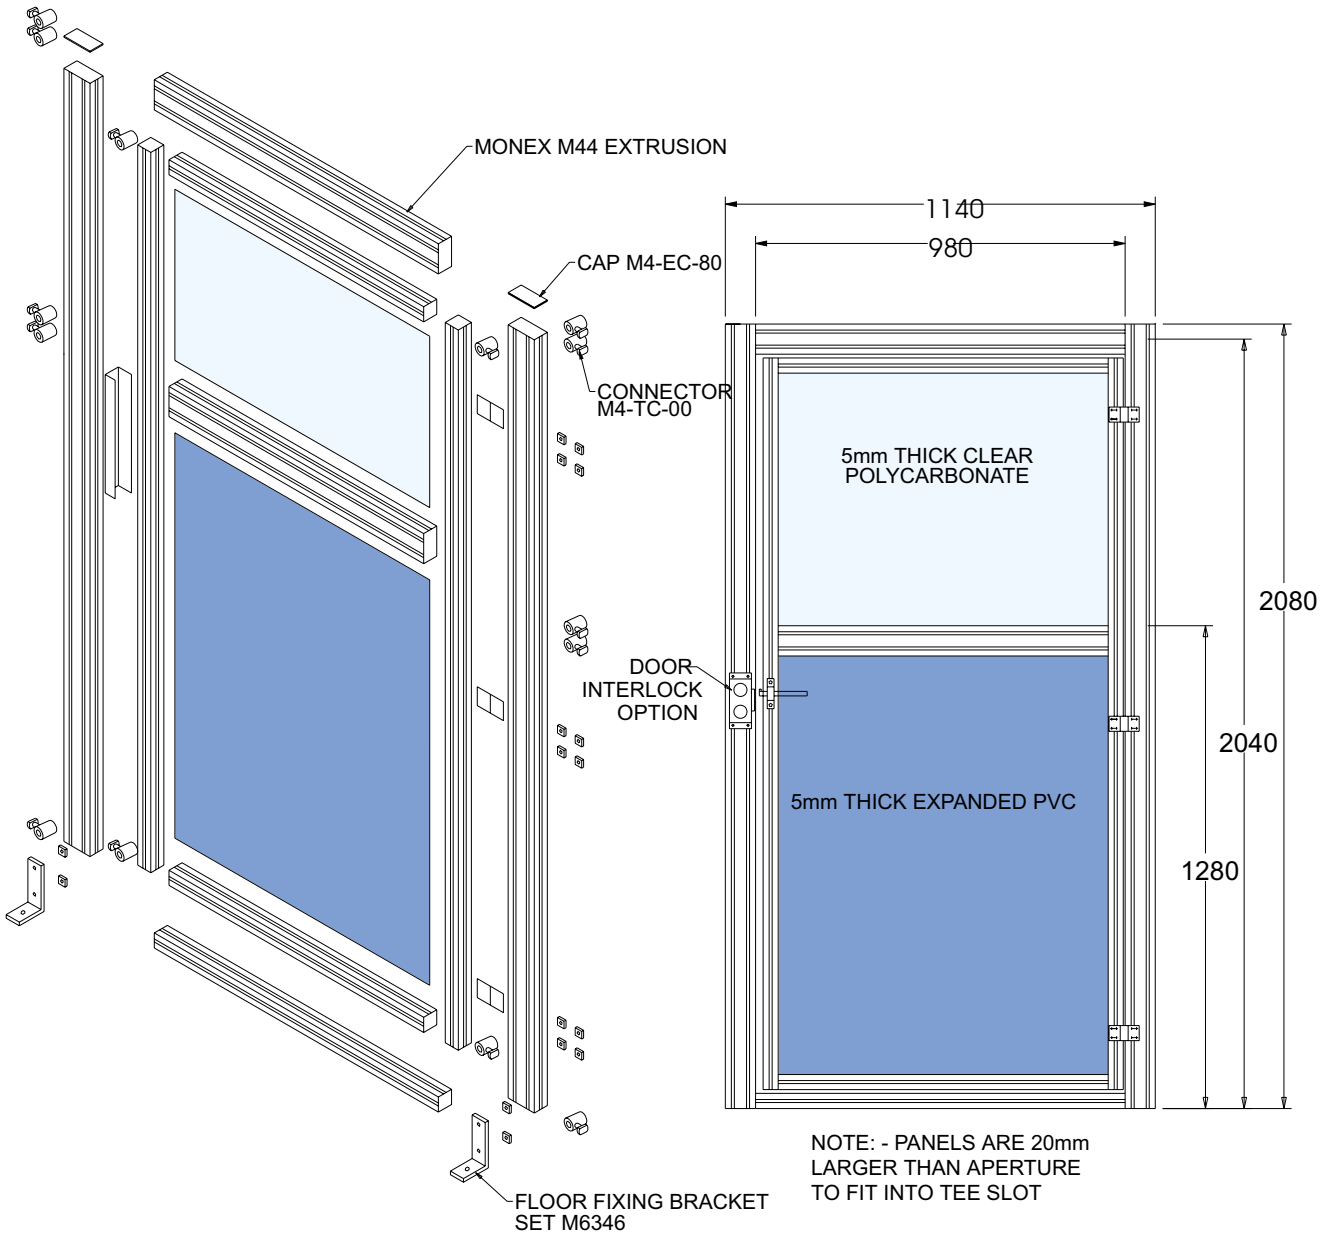

M6200 - GUARD TYPE
 2040 - HEIGHT
 1100 - PITCH
 PVC-B - LOWER PANEL: PVC-B (pvc blue)
 PC - UPPER PANEL: PC (polycarbonate clear)
 SM - LOWER PANEL: SM (steel mesh)
 SM-Y - LOWER PANEL: SM-Y (steel mesh yellow)

Door panel

Modular interlocked door panel

Choice of panels:

Expanded PVC with an 'easy clean' surface in blue, grey, green & yellow.

ORDERING EXAMPLE

M6200-2040-1100-PVC-B-PC

GUARD TYPE | HEIGHT | PITCH | UPPER PANEL: PC (polycarbonate clear) SM (steel mesh) | LOWER PANEL: PVC-B (pvc blue) SM-Y (steel mesh yellow)
