Automotive Industry

MAHLE

Driven by performance

MAHLE engine components are world-renowned among professionals for their reliability and durability. Monk Conveyors have supplied bespoke belt conveyors to MAHLE Engine Systems UK in Rugby and Kilmarnock since 2007. Our MT1950 precision belt conveyor is used with design modifications to suit MAHLE's requirements. This includes a twin belt option which allows a gap in the middle of the conveyor for product inspection. Also the ability to fit an encoder to the drive roller for measuring the position of the moving belt.

The conveyors are built and tested in our Aldershot factory, then delivered to MAHLE for installation. Our belt conveyors are ideal for moving small automotive components and we also provide bespoke systems for TRW and Federal Mogul.
