

Elevators

The conveyor sides are manufactured from low friction polyethylene and the belts can be supplied in a range of plastic materials. There is also a choice of colours. Belt flights can be added in a range of types and sizes to suit your requirements. The modular linked belt runs in a groove precisely machined in the elevator side frames. This keeps the belt under control and prevents side movement. Belt widths, horizontal lengths and inclined lengths are infinitely variable.

Elevators

Standard Elevator

- Modular linked belt
- Solid plastic machined side frames
- Various lengths available
- Range of belt widths
- Belts in Acetyl, polypropylene and polyethylene
- Flights 25mm, 50 and 76mm high
- Monex anodised aluminium frame
- Jacking feet or locking casters

Swan Neck Elevator

- Range of belt materials and colours
- Easy Change Belts
- Plastic or stainless steel pins
-

Motor Drive

- 230v Single phase or 415 three phase Variable Speed
- Integral controller
- Overload protection
- Choice of makes

Elevators

Straight Section

- Various lengths & widths available
- Variable speed
- Integral controller

Hopper

- Hoppers designed to suit your components
- Manufactures in stainless steel
- Can be lined to protect components

Special Chutes

- Special discharge chutes are available
- Manufactured in stainless steel
- Can be lined to protect components

Controls

- Inverter motor speed controller
- Adjustable ramped acceleration & deceleration
- Frequency indicator
- Simple fault finding codes
- Easy to install and program
- limited number of parameters for an AC drive
- Also available in the IP65 (NEMA 4) version
- Ratings up to 2.2 kW.
- 220v, 110v single phase or 3 phase 220v and 400v
- Comes complete with built-in class A EMI filter
